

HYGIENIC SAMPLING VALVES HSV

DESCRIPTION

The ADCAPure HSV is a series of hygienic sampling valves designed for use in high purity steam, WFI, pure water, and other systems for means of sampling.

These valves may also be used in other pharmaceutical applications where a hygienic design self-drainable manual valve is required.

MAIN FEATURES

Compact self drainable design.

Fully autoclavable.

Fine stem thread for precise flow regulation.

Easily replaceable FDA / USP Class VI compliant seals.

STANDARD SURFACE FINISH

Internal wetted parts: $\leq 0,51 \mu\text{m Ra} - \text{SF1}$.

External: $\leq 0,76 \mu\text{m Ra} - \text{SF3}$.

Other surface conditions see TIS.GIA – General information ADCAPure.

Ultrasonic cleaning.

OPTIONS: Low ferrite stainless steel, C22, and other alloys.
Other constructions on request.

USE: Clean steam, pure water, gases, and liquids compatible with the construction.
